

# Soy Candles

- ❖ Soy wax is made from natural, renewable resources.
- ❖ Soy wax burns much cleaner and is all natural, non-toxic, and non-hazardous.
- ❖ Soy candles burn evenly meaning there is no left over wax.
- ❖ Soy wax is completely biodegradable.
- ❖ Soy wax can be cleaned up with warm water and soap.
- ❖ Purchasing soy products supports the soy farmers.
- ❖ Soy burns cooler and slower allowing scents to be dispersed more evenly.
- ❖ Soy candles do not leave any black soot marks.

# Paraffin Candles

- ❖ Paraffin candles are derived from petroleum, a limited resource.
- ❖ Burning paraffin wax emits carcinogens and petro-chemicals.
- ❖ Paraffin wax contains petroleum by-products and additives that inhibit biodegradability.
- ❖ Paraffin candles do not burn evenly meaning there is wax residue. This residue is difficult to remove.
- ❖ Purchasing paraffin products support international oil companies.
